

WeldTec®

2 fer . . .

Gas Lens Collet Bodies

Weldtec's new patented "2 fer" gas lens cuts your gas lens cost in half.

- Pull off outer screen doubles the gas lens life
- No more erratic arc due to clogged screens
- No more contaminated welds due to poor gas coverage
- Pull off tab allows easy removal of the damaged outer screen

Weldtec's patented pull tab outer screen design doubles the life of the gas lens . . . and cuts your unit cost in half.

No more searching for another gas lens when a mishap occurs contaminating the outer screen of the gas lens. Simply use a sharp tungsten electrode to engage the top screen pull tab and peel off the damaged outer screen exposing a fresh screen allowing you to continue your work.

The "2 fer" gas lens is available in popular sizes, 1/16", 3/32", 1/8". Reduces your inventory of parts, saving you time and money.
